# ◤ CPLUS-V32SDM

CPLUS-V32SDM is a 3x2 matrix switch for use in a wide range of multi-format signals and can be equipped with SDM module cards to widen usages. With the commonly used HDMI outputs, this unit can switch video signals between HDMI and USB-C. This product has a module card slot to let users equip additional function cards and fulfill different scenarios.

This matrix switcher supports HDCP2.2, resolutions up to 4k@60Hz (4:4:4, 8-bit), and can be controlled via WebGUI, Telnet and RS-232. It also includes USB3.0 hub with two host-ports and two device-ports for flexible KVM configuration. With the USB extension, this product is ideal for conference, remote meeting, and education scenarios.
